

Vermont Passive House Tour Saturday November 11, 2017

November 10 - 13 are International Passive House Open House Days. During this time, homeowners (and Passive House Designers/Builders) open their homes and current projects to the public for viewing and presentations. By visiting a Passive House home, office, or even construction site, you can experience the benefits of Passive House first hand!

The Passive House building code assures a healthy, comfortable, resilient, safe, affordable, highly efficient home that is certified to perform to your expectations and is easily net-zeroed.

This year, Vermont is participating in this international event with a home tour of three homes in Central Vermont. The Passive House Tour is completely free of charge, and refreshments will be served. Come meet the designers, builders and homeowners who can tell you about their first-hand experiences with Passive House!

Site One: Shelterwood Passive House
